

Open source at the Swedish Pensions Agency

Love Hansson
2 Mar 2015

We work with *programmable data*

What does open source have to do
with me?

You are programmers

You¹_are²_programmers³_

1. At least all who work with data
2. Or, you should be
3. Yes; all of you

5/10

Reproducibility, traceability,
accountability are all centered
around *programming*, not *data*

Programming is intrinsically
a *social practice* just as much as it is
a technical skill

Enter *VERSION MANAGEMENT*
